OBJECTIVE

Reliable and detail-oriented 4th-year BSIT student seeking a part-time or OJT opportunity to contribute and grow professionally. Brings strong communication and organizational skills from active leadership in youth community work, plus a solid foundation in cybersecurity, networking, and web/software development. Quick to adapt, easy to work with, and committed to quality results.

TECHNICAL SKILLS

Cybersecurity: Threat identification & risk assessment, access control (DAC, MAC, RBAC), incident response & recovery, ethical hacking basics, vulnerability scanning & reporting
Networking: Basic networking, network troubleshooting, Ethernet/UTP cable crimping & termination
Programming & Web: HTML, CSS, JavaScript, TypeScript, C#, React, Three.js
Frameworks & Tools: .NET, ASP.NET Core, SQL Server, Firebase, Unity, Blender, Tailwind CSS, Vite, Git/GitHub
Productivity Tools: Canva, MS Word, MS PowerPoint & Office

SOFT SKILLS

Public speaking & facilitation • Teamwork & collaboration • Event planning & time management • Adaptable, dependable, fast learner

EDUCATION

College of Our Lady of Mercy *2023 – Present*
Bachelor of Science in Information Technology, 4th Year

St. Francis de Assisi Montessori School *2023*
Senior High School Graduate — Graduated with Honors

Colegio De Santiago Apostol Inc. *Elementary*

PROJECTS

SariSync — POS & Inventory Management System Live demo | GitHub

- Desktop admin application for point-of-sale and inventory management, built for sari-sari store owners with Windows Forms and .NET, plus a RESTful ASP.NET Core web API for online ordering
- Developed core modules for inventory management, POS, supplier tracking, stock monitoring, and order history
- Built a sales dashboard showing best-selling category/product, total sales, and inventory counts for quick business insights
- Used SQL Server for data storage and Swagger for API documentation, following an MVP architecture for maintainable code

Tech: Windows Forms, C#, .NET, ASP.NET Core, SQL Server, Swagger, HTML5, MVP structure

Anatomia (AnatomiaLearn 3D) — Interactive 3D Anatomy Learning App Live demo | GitHub

- Capstone project that helps Radiologic Technology students learn human anatomy through interactive 3D models, detailed descriptions, and quizzes
- Built separate teacher and student dashboards: teachers create classrooms and manage quizzes, students explore 3D models and join classrooms
- Added gamification elements such as levels, points, and badges, plus quiz activities and progress tracking to boost engagement

Tech: React, Three.js, JavaScript, HTML5, CSS3, Unity, C#, Firebase, Blender

HidePix — Image Steganography Tool Live demo | GitHub

- Built a browser-based steganography tool that hides text inside PNG images using LSB and LSB matching, with the hiding, header, and detection logic written by hand
- Added AES-GCM password encryption (PBKDF2-SHA-256), a Detect tab with chi-square analysis, and client-side processing so images and messages never leave the device

Tech: React, TypeScript, Vite, Tailwind CSS, AES-GCM, PBKDF2, Vercel

JCLabs — Personal Portfolio Website Live demo | GitHub

- Built a responsive portfolio with a cybersecurity-themed UI, light mode, loading screen, certificate viewer, and contact form

Tech: HTML5, CSS3, JavaScript, Vite, Vercel

LEADERSHIP & INVOLVEMENT

Vice Chairman, Sub Parish Commission on Youth (SPCY) — Leads event planning and logistics for parish youth programs. *2023 – Present*
